IMPORTANT SAFETY INFORMATION

SAVE THESE INSTRUCTIONS

WARNING: Risk of Explosive Gases, Electric Shock or Fire.

- Keep out of reach of children.
- To reduce the risk of personal or property damage, read and understand all directions and warnings prior to use of this battery charger/maintainer.
- Do not use in wet conditions or near combustible materials. Keep away from flames, smoke or sparks while maintaining. Never smoke in the area of the battery or engine.
- To reduce the risk of electric shock, connect to only properly grounded outlets.
- Use of an extension cord is not recommended and could result in fire.
- Use only in a well-ventilated area.
- Do not operate if cords or wires are frayed or defective, or if maintainer base is defective in any way. Do not attempt to open the maintainer as this could result in electric shock.
- This unit is comprised of switches which could produce sparks. Make sure you have adequate space to use this maintainer.
- Use only on lead acid or AGM batteries. Do not use this maintainer for maintaining dry cell batteries, as this could result in personal injury or property damage due to battery explosion.
- Do not maintain a frozen battery.
- Use of an attachment not recommended or sold by the battery charger manufacturer may result in a risk of fire, electric shock, or injury to persons.
- Do not operate maintainer with damaged cord/plug - replace the cord/plug immediately.
- Do not operate maintainer if it has received a sharp blow, been dropped, or otherwise damaged in any way; take it to a qualified serviceman.
- Do not disassemble maintainer; take it to a qualified serviceman when service or repair is required. Incorrect reassembly may result in a risk of electric shock or fire.
- To reduce risk of electric shock, unplug maintainer from outlet before attempting any repairs or cleaning.
- Turning off controls will not reduce this risk.

PERSONAL PRECAUTIONS

- Remove metal items such as rings, bracelets and necklaces while working with this maintainer. Lead acid batteries can produce a short circuit high enough to cause burns.
- Always wear protective eyewear and gloves when working with batteries. If battery acid comes in contact with your skin or clothing, immediately wash the area with soap and water and get medical attention right away.
- Make sure that someone is within range of your voice to come to your aid if needed while you work with or are near a lead-acid battery.
- Avoid touching your eyes while working with a battery. Have plenty of fresh water and soap nearby for use in case battery acid contacts your

eyes, skin or clothing. If this happens, wash immediately with soap and water, then get medical attention.

WARNING: RISK OF EXPLOSIVE GASES.

- a) WORKING IN VICINITY OF A LEAD-ACID BATTERY IS DANGEROUS. BATTERIES GENERATE EXPLOSIVE GASES DURING NORMAL BATTERY OPERATION. FOR THIS REASON, IT IS OF UTMOST IMPORTANCE THAT YOU FOLLOW THESE INSTRUCTIONS EACH TIME YOU USE THE MAINTAINER.
- b) To reduce risk of battery explosion, follow these instructions and those published by battery manufacturer and manufacturer of any equipment you intend to use in vicinity of battery. Review cautionary markings on these products and on engine.

PREPARING TO CHARGE

SHIELD EYES:
Explosive gases can cause eye injury or blindness.

CONTAINS SULFURIC ACID:
May cause severe burns and blindness.

- If it is necessary to remove the battery prior to maintaining, always remove the grounded terminal first. Ensure all electrical accessories are off prior to maintaining.
- It is best to clean the battery terminals prior to maintaining. Using a battery terminal brush is a good way to remove corrosion.
- When charging a lead-acid battery that is not sealed, it may be necessary to add distilled water into battery so the battery acid solution reaches the level as specified by manufacturer. Careful do not overfill the battery.
- Read individual precautions and warnings outlined by the battery manufacturer relative to maintaining. Ensure that charger clips make a tight connection.
- NEVER smoke or allow a spark or flame in the vicinity of the battery or engine.
- Use charger for charging LEAD-ACID batteries only.
- NEVER charge a frozen battery.

LOCATION TO USE

- Make sure you have adequate space to use this maintainer. Position the maintainer as far away from the battery as the DC cables permit.
- Never place the maintainer directly above the battery that is being maintained; as this may cause the maintainer to be damaged by gases expelled from the battery.
- Never set a battery or any other object on the maintainer.
- Use only in a well-ventilated area.
- Never allow battery acid to drip on the maintainer when reading electrolyte specific gravity or filling battery.
- Do not operate charger in a closed-in area or restrict ventilation in any way.
